# Introduction

---

This document presents a brief data profile for the South Eastern Sydney district. It contains a series of tables and graphs that show the characteristics of persons, families and communities. It includes demographic, housing, child development, community safety and child protection information. Where possible, this information is presented at the local government area (LGA) level.

In the South Eastern Sydney district, there are seven LGAs:

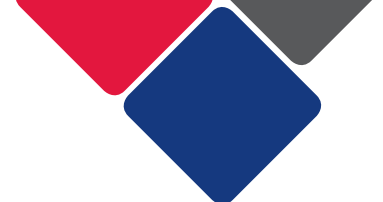

- Bayside<sup>1</sup>
- Georges River
- Randwick
- Sutherland Shire
- Sydney<sup>2</sup>
- Waverley
- Woollahra

The data presented in this document is from a number of different sources, including the Australian Bureau of Statistics (ABS), Bureau of Crime Statistics and Research (BOCSAR), NSW Health Stats, the Australian Early Developmental Census (AEDC) and NSW Government administrative data.

---

<sup>1</sup> In 2016, the Botany Bay and Rockdale councils merged to form the Bayside LGA. The data sources used to develop this report do not yet reflect this change in boundaries. As such, where possible, we have merged the data available to us on the Botany Bay and Rockdale LGAs to present figures for the Bayside LGA. When this was not possible, we have presented the data on both the Botany Bay and Rockdale areas.

<sup>2</sup> Please note that the City of Sydney LGA sits across both the South Eastern Sydney and Sydney districts, so the data is included in both Data Profiles.

The majority of these sources are publicly available. Please see the source statements for each table and graph for where the data was extracted from and for where you can find more information.

Please also note that the information extracted from the original sources may change slightly as the data is updated over time by the original author (e.g. ABS, NSW Healthstats). As such, for each table or graph we have provided the date this information was accessed.

If you would like additional suburb-level and Aboriginal and Torres Strait Islander specific data, the following sources are available to you:

- The ABS provides demographic, cultural and linguistic diversity, employment and housing data at a suburb level through Quick Stats: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20QuickStats>. For example, for the La Perouse suburb, select 'La Perouse, NSW: State Suburb (SSC)' from the drop down menu.
- The ABS also ranks suburbs on the Socio-Economic Indexes for Areas (SEIFA): [http://stat.data.abs.gov.au/Index.aspx?DataSetCode=SEIFA\\_SSC](http://stat.data.abs.gov.au/Index.aspx?DataSetCode=SEIFA_SSC). For more information on the SEIFA, see page 29.
- BOSCAR records criminal offences at a suburb level: [https://www.bocsar.nsw.gov.au/Pages/bocsar\\_datasets/Datasets-.aspx](https://www.bocsar.nsw.gov.au/Pages/bocsar_datasets/Datasets-.aspx). Follow the 'Suburb' link in the Geographic breakdown category for a spreadsheet containing all suburb-level crime data.
- Information about Aboriginal and Torres Strait Islander persons, families and dwellings, including comparisons with non-Indigenous people, is also available at LGA level through the ABS 2016 Census Community Profiles: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20Census%20Community%20Profiles>. For example, for information about the Aboriginal and Torres Strait Islander population of Randwick, select 'Randwick (C), NSW: Local Government Area (LGA)' from the drop down menu, and follow the link for the 'Aboriginal and Torres Strait Islander Peoples Profile'.

**13,129**  
Public and AHO housing tenancies - June 2018  
**8.8% of NSW tenancies**

# Demographic Data

## Population – South Eastern Sydney

The population in the South Eastern Sydney district was estimated at 991,429 in the 2016 Census. This district can be broken down into seven local government areas (LGAs). The largest LGA is Sutherland Shire with an estimated population of 218,464. The smallest LGA is Woollahra with an estimated population of 54,240 (see Figure 1).

Figure 1. Population of South Eastern Sydney district, by LGA

Source: ABS Quickstats, 2016 Census: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20QuickStats> (accessed 2 October 2019)

The median age in New South Wales is 38 years of age. In the South Eastern Sydney district, the LGAs of Georges River and Woollahra are closest to the state average, with 37 and 39 median age respectively. Bayside, Waverley, Randwick, and Sydney LGAs all have a younger population with their median ages at 35, 35, 34, and 32 respectively. Sutherland Shire LGA has a median age of 40.

Table 1 shows a breakdown of age for each LGA in the South Eastern Sydney district.

Table 1. Age breakdown of the population by LGA in South Eastern Sydney

## Aboriginal and Torres Strait Islander population

In the South Eastern Sydney, 1.0% (n=9,773) of the population identify as Aboriginal and/or Torres Strait Islander (see Table 2). The majority of these people are children and young people; 44.5% of the Aboriginal and Torres Strait Islander population is under 25 years old. This is significantly higher than the NSW state average, where only 28.6% of the Aboriginal and Torres Strait Islander population are under 25 years old.

## Country of birth

In the South Eastern Sydney district, 47.2% of residents were born in Australia (see Table 3). This is much lower than the New South Wales state average of 65.5%. Sydney and Bayside LGAs had the largest proportions of residents born overseas.

The most common birth places, other than Australia, were China (excluding SARs and Taiwan), England, and New Zealand.

**Table 3. Country of Birth in South Eastern Sydney, by LGA**

## Languages spoken at home

In the South Eastern Sydney district, 59.1% of residents spoke only English at home (see Table 4). This is lower than the New South Wales state average of 68.5%.

The proportion of households where a non-English language was spoken at home was highest in Bayside (59.4%) and Georges River (56.1%).

**Table 4. Languages spoken at home in South Eastern Sydney, by LGA**

## Migration stream

Of the total number of migrants arriving in NSW from 1 January to 31 December 2017, 22.8% (n=18,382) migrated to the South Eastern Sydney district (see Table 5).

The largest number of migrants to the South Eastern Sydney district settled in Sydney and most were skilled migrants (n=4,307) followed by family migrants (n=1,462) and then humanitarian migrants (n=22).

A total of 118 humanitarian migrants settled in the South Eastern Sydney district from January - December 2017.

**Table 5. Migration Stream in South Eastern Sydney district, by LGA, between 1 January and 31 December 2017**

<sup>1</sup> The figures presented here a combination of the Kogarah and Hurstville communities. These councils combined in 2016 to form the Georges River LGA.

# Children and Young People

## Government schools

The following tables provide information about the government schools in the six LGAs that make up the South Eastern Sydney district. These tables provide information on the following factors:

<b>No. of FTE enrolments</b>	The number of full-time equivalent (FTE) enrolments indicates the number of students who attended the school over the course of the academic year. For example, 39.2 means 39 students were enrolled full time for one academic year and one student was enrolled for a fifth of the year.
<b>% of ATSI</b>	The percentage of FTE students enrolled who identify as Aboriginal and/or Torres Strait Islander.
<b>% of LBOTE</b>	The percentage of students (headcount) who have a language background other than English (LBOTE). A student has a LBOTE if they, or their parents or guardians, speak a language other than English at home.
<b>ISCEA value</b>	<p>The Index of Community Socio-Education Advantage (ICSEA) provides information about the socio-educational backgrounds of a school's students. This is worked out by looking at the parents' occupation and education, a school's geographical location, and the proportion of Indigenous students.</p> <p>The ICSEA is set at an average of 1000. The lower the ICSEA level, the lower the educational advantage of students who go to this school. The highest score of a public school in New South Wales is 1245, and the lowest score is 543.</p>
<b>% School attendance</b>	The attendance rate is the number of actual FTE student days attended by full-time students in Years 1-10 in Semester One as a percentage of the total number of possible student-days attended in semester one.

There are 156 government schools in South Eastern School district (Table 6a-6g):

- 16 in the Randwick LGA
- 57 in Sutherland Shire
- 20 in Sydney LGA
- 6 in the Waverley LGA
- 6 in Woollahra LGA
- 29 in Georges River
- 22 in Bayside.

The largest of these school is Menai High School in Sutherland Shire (1256.6 FTE enrolments) and the smallest is La Perouse Public School in Randwick (34 FTE enrolments). La Perouse School also has the largest percentage of Indigenous students (74%). The school with the lowest attendance is Plunkett St Public School (83.3%), in the Sydney LGA. The school with the highest school attendance is Coogee Public School in Randwick (97.3%).

The schools with the highest percentage of LBOTE students are located in Bayside: Arncliffe West Infants School in (94%) followed by Sydney Technical High School and Eastlakes Public School (93%).

The school with the highest ISCEA value is Conservatorium High School in Sydney (1204). The school with the lowest is Centennial Park School (741), a high school that caters specifically to student with mental health issues, followed by La Perouse Public School (789).

The Department of Education also provides information about suspensions and expulsions from government schools at the district level<sup>3</sup>.

Table 7 shows that the South Eastern Sydney district has a lower proportion of students who received short suspensions (four days or less) in 2018 compared to the NSW state average. In 2018, 1.8% of students received short suspensions in South Eastern Sydney, compared to 4.0% in NSW. The proportion of students who received long suspensions (4-20 school days) was also lower than the NSW state average; 0.6% in the district compared to 1.5% in the state.

In the South Eastern Sydney district, less than five students were expelled for misbehaviour in 2018, and 11 were expelled for unsatisfactory participation.

**Table 7. Suspensions and expulsions from government schools in South Eastern Sydney district, 2018**

	South Eastern Sydney	New South Wales
Total short suspensions <sup>1</sup>	1,746	52,755
Total number students short suspended	1,250	32,343
Students short suspended as % of enrolment	1.8%	4.0%
Total long suspensions	543	17,235
Total number students long suspended <sup>2</sup>	433	12,355
Students long suspended as % of enrolment	0.6%	1.5%
Students expelled for misbehaviour	<5 <sup>3</sup>	175
Students expelled for unsatisfactory participation	11	122

**Source:** NSW Centre for Education Statistics and Evaluation, Suspensions and Expulsions in NSW government schools (2015-2018): <https://data.cese.nsw.gov.au/data/dataset/suspensions-and-expulsions-in-nsw-government-schools> (accessed 9 October 2019)

- <sup>1</sup> includes students on short suspension (four days or less) on more than one occasion  
<sup>2</sup> includes students on long suspension (four to 20 school days) on more than one occasion  
<sup>3</sup> In order to protect individual students' identities, values 5 and under are represented as <5

<sup>3</sup> To our knowledge, LGA data is unavailable.

## Early childhood development

The Australian Early Development Census (AEDC) measures the early childhood development of children in Australia in their first year of full-time school. It measures this across five domains that predict later health, education and social outcomes:

- physical health and wellbeing
- social competence
- emotional maturity
- language and cognitive skills (school-based)
- communication skills and general knowledge

The AEDC results can tell us if children are developmentally on track or if they need more support through their school years.

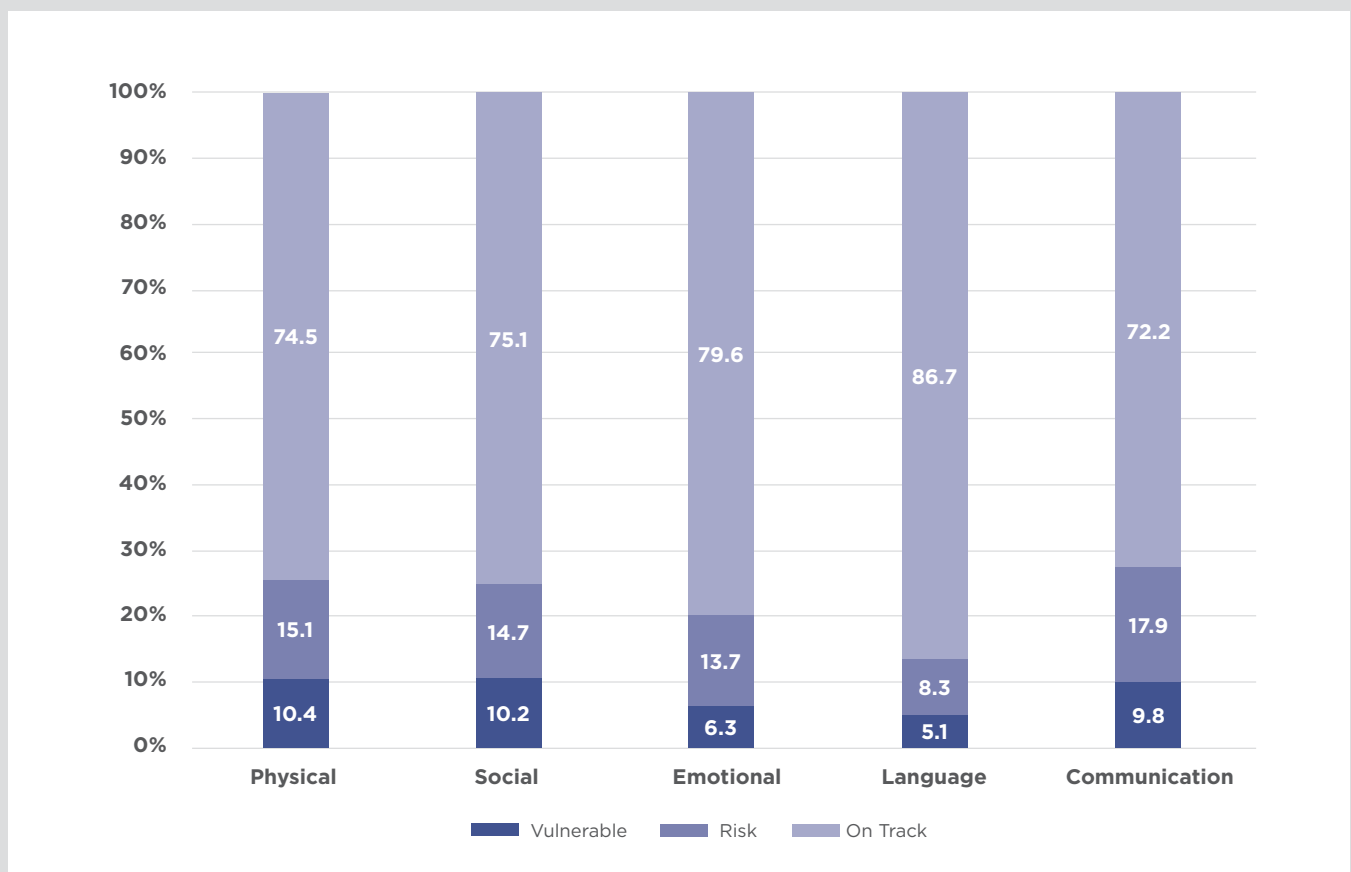

In the 2018 AEDC, the majority of children in the South Eastern Sydney district were developmentally 'on track' (see Figures 2-8). In all seven LGAs more than 70% of children were 'on track' for each of the five AEDC domains.

The proportion of children developmentally 'at risk' and 'vulnerable' was greater in Bayside and Georges River LGAs, compared with Randwick and Sutherland Shire LGAs, which both had greater than 80% of children who were 'on track' in all five domains.

### MORE INFORMATION

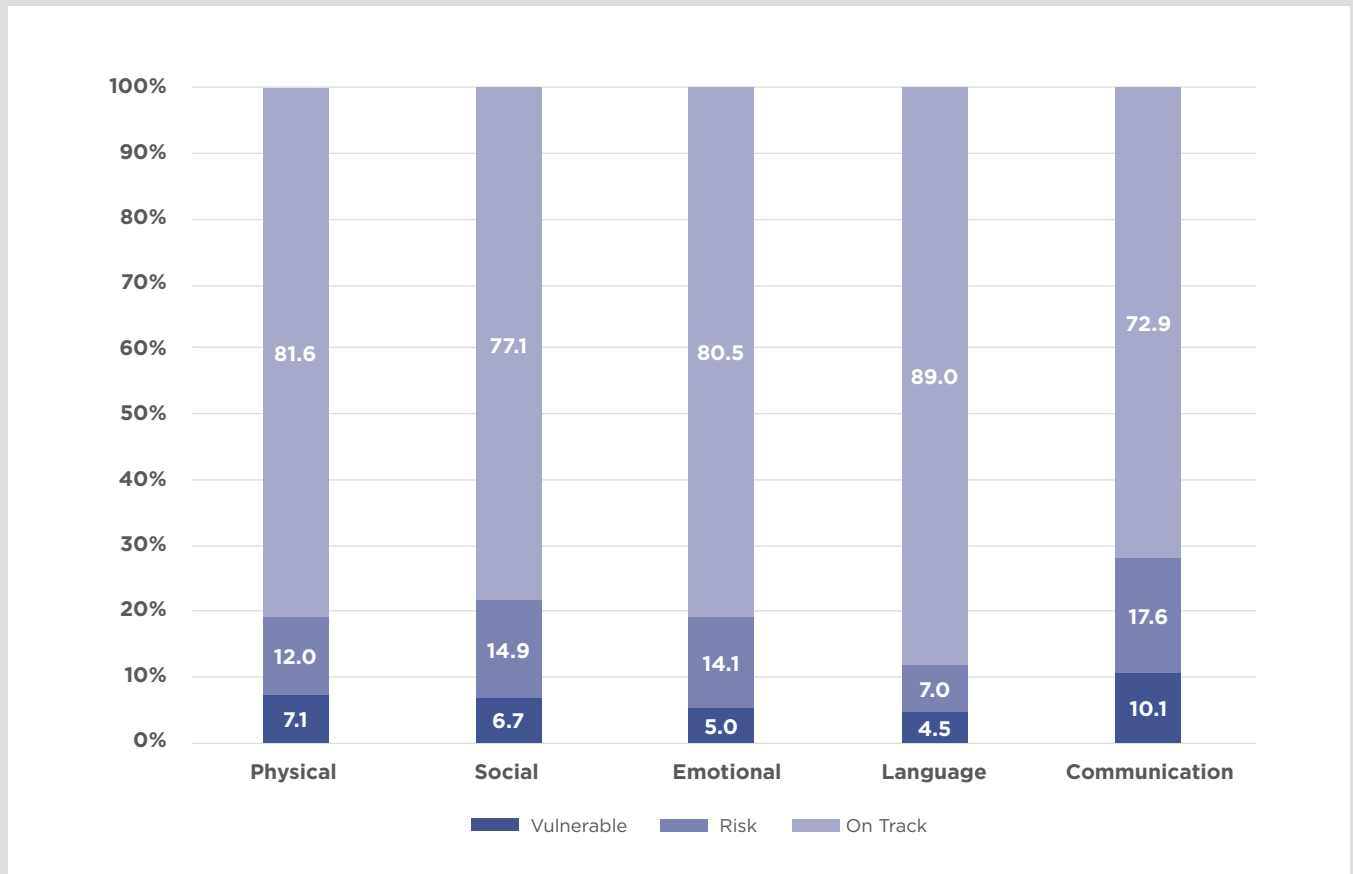

More information about the AEDC domains can be found in the [About the AEDC Domains](#) fact sheet.

The AEDC also has two summary indicators that measure developmental vulnerability across all five domains.

In 2018, 7.3% of children were developmentally vulnerable on two or more domains in the South Eastern Sydney district (see Table 8). This is less than the NSW state average of 9.6%. Bayside had the highest proportion of children developmentally vulnerable on two or more domains, at 9.9%. Sutherland Shire had the lowest proportion of children developmentally vulnerable on two or more domains, at 5.6%.

**Table 8. Percentage of children developmentally vulnerable in South Eastern Sydney district, by LGA, 2018**

	Developmentally vulnerable on 1 or more domain		Developmentally vulnerable on two or more domains		Total no. of children measured
	No.	%	No.	%	
Bayside	368	22.0	165	9.9	1,670

# Vulnerable children and young people

Using the Their Futures Matter (TFM) Human Services Dataset, TFM identified three vulnerable groups of children and young people in NSW:

<p><b>Young children aged 0-5</b></p>	<p>Children aged 5 or younger at 30 June 2017 with one or more of the following:</p> <ul style="list-style-type: none"> <li>• 1 or more parental risk factors</li> <li>• 2 or more perinatal risk factors</li> <li>• Assessment as at ROSH</li> </ul>
<p><b>Children aged under 15 and affected by mental illness</b></p>	<p>Children under 15 years at 30 June 2017 with one or more the following:</p> <ul style="list-style-type: none"> <li>• Use of NSW mental health services (hospital or ambulatory)</li> <li>• Parental use of NSW mental health services (hospital or ambulatory)</li> </ul>
<p><b>Children and young people aged 15-18 and affected by mental illness</b></p>	<p>Children and young people between 15-18 years at 30 June 2017 with one or more of the following:</p> <ul style="list-style-type: none"> <li>• Use of NSW mental health services (hospital or ambulatory)</li> <li>• Parental use of NSW mental health services (hospital or ambulatory)</li> </ul>

For each vulnerable group, TFM identified five indicators associated with poor outcomes later in life. They also identified the proportion of this group with this indicator. TFM identified these indicators by undertaking predictive modelling and analysis, using the TFM Human Services Data set. This dataset brings together data collected by ten different government agencies. It includes data on child protection, housing, justice, health, education and commonwealth service use.

Table 9 shows the top five indicators for each vulnerable group in the South Eastern Sydney district.

**Table 9. Indicators of vulnerable children and young people in the South Eastern Sydney district**

Vulnerable group	Indicator	% of group with indicator
Young children aged 0-5	Parents have interacted with justice system	17
	Mother smoked during pregnancy	12
	Child had concern report	15
	Mother aged 21 and under at childbirth	5
	Parents have been in social housing	5
Children aged under 15 and affected by mental illness	Child had a concern report	24
	Mother smoked during pregnancy	11
	Parents have interacted with justice system	16
	Mother aged 21 and under at childbirth	6
	Parents have been in social housing	9
Children and young people aged 15-18 and affected by mental illness	NAPLAN Year 7 band less than 6	32
	Had concern report in the last three years	27
	Hospital admission in the last three years	30
	Family have been in social housing	16
	Has appeared in court	5

**Source:** Their Futures Matter, FACS District Data pack, South Eastern Sydney district

Table 9 shows the number and proportion of children in each of the vulnerable groups by LGA. It also shows us what proportion of this group identify as Aboriginal.

For example, in Randwick LGA, 10,310 children were under the age of five. Of these children, 18% were identified as vulnerable and 10% of these vulnerable children identified as Aboriginal. By comparison, in Woollahra, 16% of children under the age of five were vulnerable and 1% of these children identified as Aboriginal.

When looking at children under the age of 15, 11% were affected by a mental illness in Randwick LGA and 10% of these children identified as Aboriginal. In Woollahra, 8% of this group were affected by a mental illness and 2% identified as Aboriginal.

When looking at young people between the ages of 15 and 18, 15% were affected by a mental illness in the Randwick LGA, and 11% of this group were Aboriginal. Compared to only 9% in Woollahra LGA, of which none were Aboriginal.

**Table 10. Vulnerable groups of children and young people in the South Eastern Sydney district, by LGA**

		Bayside	Georges River	Randwick	Sutherland Shire	Sydney	Waverley	Woollahra

## Contact with child protection services

In 2016-17, 0.4% (n=717) of children and young people aged 18 and under were in out-of-home care (OOHC) in the South Eastern Sydney district (see Table 11). The majority of these children and young people were in the Sutherland Shire LGA.

In 2016-17, 2.4% (n=4,382) of children and young people aged 18 and under were found to be at risk of significant harm (ROSH). Again, the majority of these children were in the Sutherland Shire (n=1,284).

Woollahra had a smallest amount of children reported, reported at ROSH or in OOHC.

---

## Education

Of people aged 15 and over in the South Eastern Sydney district, 35.6% reported having completed a bachelor's degree level and above as their highest level of educational attainment (see Table 12). This is much higher than the NSW state average of 23.4%. The next most common highest level of education was Year 12, at 18.1%.

**Table 12. Level of highest educational attainment in South Eastern Sydney, by LGA (people aged 15 years and over)**

## Employment

There were 535,851 people who reported being in the labour force in the week before Census night in the South Eastern Sydney district. Of these, 62.4% were employed full time, 28% were employed part-time and 5.2% were unemployed (see Table 13).

Georges River LGA had the highest proportion of people unemployed, at 6.5%, and the proportion of people unemployed in Woollahra was the least, at 3.3%.

**Table 13. Employment in South Eastern Sydney district, by LGA**

	Worked full-time		Worked part-time		Away from work		Unemployed		Total	
	No.	%	No.	%	No.	%	No.	%	No.	%

## Income

The median weekly personal income for people aged 15 years and over in the South Eastern Sydney district was \$925. This is much higher than the NSW median of \$664 (see Table 14). The median weekly family income, \$2,497, and median weekly household income, \$2,010, in the South Eastern district were also much higher than the state average.

**Table 14. Median weekly income in South Eastern Sydney, by LGA (people aged 15 years and over)**

	Personal	Family	Household
Bayside	\$693	\$1,833	\$1,600
Georges River	\$640	\$1,817	\$1,654
Randwick	\$834	\$2,421	\$1,916
Sutherland Shire	\$837	\$2,312	\$1,979
Sydney	\$953	\$2,524	\$1,926
Waverly	\$1,151	\$2,917	\$2,308
Woollahra	\$1,365	\$3,656	\$2,687
<b>South Eastern Sydney</b>	<b>\$925</b>	<b>\$2,497</b>	<b>\$2,010</b>
<b>NSW</b>	<b>\$664</b>	<b>\$1,780</b>	<b>\$1,486</b>

**Source:** ABS Quickstats, 2016 Census: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20QuickStats> (accessed 2 October 2019)

In the South Eastern Sydney district, most LGAs have a smaller proportion of households with less than \$650 gross weekly income, when compared to the state average of 19.7% (see Table 15). Botany Bay (now part of the Bayside LGA), was slightly higher than the NSW average at 20.3%, as was Sydney LGA (19.9%). The LGA with the smallest proportion of households with less than \$650 gross weekly income was Woollahra at 10.3%, followed by Waverly at 12.4%.

**Table 15. Household income in South Eastern Sydney district, by LGA**

		% of households with less than \$650 gross weekly income	% of households with more than \$3000 gross weekly income
Cessnock	Botany Bay	20.3	20.8
	Rockdale	18.3	17.6
Georges River		17.4	20.4
Randwick		19.0	29.0
Sutherland Shire		13.9	27.5
Sydney		19.9	29.0
Waverly		12.4	38.6

<b>NSW</b>		<b>19.7</b>	<b>18.7</b>

**Source:** ABS Quickstats, 2016 Census: <https://www.abs.gov.au/websitedbs/D3310114.nsf/Home/2016%20QuickStats> (accessed 2 October 2019)

## Socio-economic advantage and disadvantage

The Socio-Economic Indexes for Areas (SEIFA) is a suite of four indices based on a broad range of social and economic aspects of the Australian population, based on information from the 2016 Census of Population and Housing. The information presented below is based on the Index of Relative Socio-economic Advantage and Disadvantage (IRSAD). The IRSAD summarises information about the economic and social conditions of people and households within an area.

In the South Eastern Sydney district, Woollahra has the highest SEIFA score (1165) and is ranked the highest (see Table 16). This means Woollahra is relatively advantaged compared to the other LGAs in the South Eastern Sydney district.

Conversely, Bayside has the lowest SEIFA score (1023/1028) and is ranked the lowest (see Table 16). This means Bayside is relatively disadvantaged compared to the other LGAs in the South Eastern Sydney district.

**Table 16. LGA Index of Relative Socio-economic Advantage and Disadvantage in the South Eastern Sydney district, 2016**

	Score <sup>1</sup>	NSW Rank <sup>2</sup>	NSW Decile <sup>3</sup>
Bayside	1028	102	8
Botany Bay	1023	101	8
Georges River	1043	107	9
Randwick	1096	117	9
Sutherland Shire	1088	114	9
Sydney	1095	116	9
Waverley	1140	124	10
Woollahra	1165	129	10

**Source:** ABS, Socio-Economic Indexes for Areas (SEIFA), 2016, 2033.0.55.001, <https://www.abs.gov.au/AUSSTATS/abs@.nsf/DetailsPage/2033.0.55.0012016?OpenDocument> (accessed 26 September 2019)

- <sup>1</sup> **Score:** A low IRSAD score indicates that an area is relatively disadvantaged compared to an area with a higher score.
- <sup>2</sup> **Rank:** All areas are ranked from the lowest to the highest score. The area with the lowest score is ranked number one, the area with the highest score is ranked 129. The State Rank can only be used to compare areas with a single state/territory.
- <sup>3</sup> **Decile:** All areas are ordered from the lowest to highest score, the lowest 10% of areas are given a decile number of 1 and so on, up to the highest 10% of areas which are given a number of 10. This means that areas are divided into 10 groups, depending on their score. Decile 1 is the most disadvantaged relative to other deciles.

# Social Environment

## Community safety and crime

In the South Eastern Sydney district, 3,085 domestic violence-related assaults and 5,637 non-domestic violence related occurred between January and December 2018. Domestic violence-related assault was most likely to occur in the Sydney LGA, with a rate of 431.9 per 100,000 people (see Table 17).

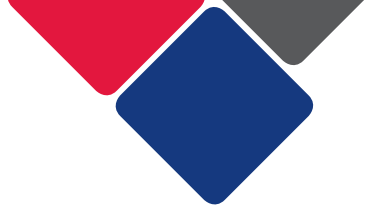

The highest rate of non-domestic violence-related assaults was also in the Sydney LGA, with the rate of 1380.3 per 100,000.

**Table 17. Incidents of crime recorded by the NSW Police Force in South Eastern Sydney, by LGA, January - December 2018**

	Domestic violence-related assault			Non-domestic violence-related assault		
	No.	Rate per 100,000 population	Rank in NSW <sup>1</sup>	No.	Rate per 100,000 population	Rank in NSW
Bayside	582	342.2	69	530	311.6	79
Georges River	430	275.1	85	373	238.7	93

<sup>1</sup> Ranked by rate of domestic and non-domestic violence per 100,000 population, from 1-129 (where number 129 equals the lowest rate, and number one equals the highest).

Of the LGAs in the South Eastern Sydney district, the highest number of drug offences was cannabis use and/or possession in Sydney LGA (707.5 offences per 100,000). Sydney also had the highest rate of ecstasy and cocaine use and/or possession (425.5 and 372.2 offences per 100,000 respectively; see Table 18).

**Table 18. Recorded drug offences (possession and/or use) in South Eastern Sydney district, Jan-Dec 2018, by LGA**

When looking at the age of alleged offenders in South Eastern Sydney, 20-29 year olds are most likely to offend, followed by 40 year olds and above, and 30-39 year olds (see Figure 9). This was common across most of the LGAs, other than Georges River and Sutherland Shire LGAs, where 10-17 year olds are most likely to offend.

# Maternal Health

## Teenage pregnancy

Teenage parenthood is associated with a number of adversities, including low socio-economic status, educational under-achievement and drugs abuse. In turn, young parenthood can act to further entrench some of these problems and perpetuate a cycle of disadvantage.

In 2018, 45 mothers aged 19 and under gave birth in the South Eastern Sydney district (see Table 19). This accounts for 0.4% of all births in the district. This proportion is much lower than the NSW state average of 1.9%. The LGA of Georges River has the highest proportion of young mothers aged 19 and under in 2018. However, this was still only 0.8% (n=13) of all births.

Table 19. Young mothers who gave birth<sup>1</sup> in South Eastern Sydney district, by LGA, 2018

LGA	No. of mothers 19 and under	% of mothers giving birth aged 19 and under	Total no. of births
Bayside	8	0.4	2,108
Georges River	13	0.8	1,570
Randwick	9	0.5	1,694
Sutherland Shire	7	0.3	2,437
Sydney	8	0.4	1,954
Waverley	0	0.0	953
Woollahra	0	0.0	621
<b>South Eastern Sydney</b>	<b>45</b>	<b>0.4</b>	<b>11,337</b>

<sup>1</sup> Number of mothers who gave birth (stillbirth or live birth) in NSW, regardless of place of permanent residence

## Smoking during pregnancy

Smoking during pregnancy is an important modifiable risk factor for low birthweight, pre-term birth, placental complications and perinatal mortality.

Between 2015-2017, mothers in the South Eastern Sydney district were less likely to smoke during pregnancy, compared to the NSW state average (see Figure 10). The LGA with the highest proportion of mothers who smoked during their pregnancy was Bayside, at 3.8%. Mothers in Woollahra were least likely to smoke during pregnancy (0.9%).

Figure 10. Proportion of mothers in the South Eastern Sydney district who smoked during pregnancy, 2015-2017

## Australian Mothers Index

Since 2000, Save the Children has produced a Mother's Index showing where mothers do best and where they face the greatest hardships. This index compares countries world-wide, as well as Australian states and territories and LGAs.

The information in Table 20 is derived from the Local-level Mothers Index. Five indicators make up this index:

- maternal health - the proportion of pregnant women with at least one antenatal visit in the first trimester
- children's wellbeing - the proportion of children under 5 developmentally on track (measured by the AEDC)
- educational status - the proportion of women completing Year 12 or above
- economic status - average household income
- relative socioeconomic disadvantage - a measure of a mother's access to material and social resources and her ability to participate in society.

These indicators were used to rank every LGA in NSW, where 1 is the best rank and 152 is the worst.

In the South Eastern district, Woollahra was given the best ranking in the state, 1 of 152 (see Table 20). Bayside received the lowest rank in the South Eastern Sydney district - 40 in Botany Bay and 46 in Rockdale. This means that mothers in Bayside are facing much greater hardships than mothers in Woollahra.

**Table 20. Mothers Index Ranking in the South Eastern Sydney District, by LGA**

LGA	NSW Ranking
Bayside	40
Botany Bay	40
Rockdale	46
Georges River	28
Hurstville	28
Kogarah	29
Randwick	16
Sutherland Shire	19
Sydney	24
Waverley	8
Woollahra	1

**Source:** Harris, J and Wells, M, 2016, State of Australia's Mothers, Save the Children, Sydney: <https://apo.org.au/sites/default/files/resource-files/2016/05/apo-nid63692-1201431.pdf> (accessed 2 October 2019)

# Disability

## Need for assistance with core activities

In the South Eastern Sydney district, 3.9% of the population need help or assistance with core activities (see Table 21). This amounts to 38,682 people. In the Bayside LGA, 5.3% of people need help or assistance with core activities. This was the highest proportion of all seven LGAs. In Woollahra LGA, 2.6% of people need help or assistance with core activities. This was the smallest proportion of all seven LGAs.

Table 21. Need for assistance with core activities<sup>1</sup> in South Eastern Sydney district, by LGA

	Has need for assistance		Does not have need for assistance		Need for assistance not stated		Total
	No.	%	No.	%	No.	%

<sup>1</sup> A person's need for help or assistance in one or more of the three core activity areas of self-care, mobility, and communication, because of a disability, long-term health condition (lasting six months or more) or old age.

# Housing

## Households

In the South Eastern Sydney district, the average number of people per household is 2.5. Georges River has the highest average people per household, 2.9 and Woollahra has the lowest average, at 2.3 (see Table 22).

The majority of households in the South Eastern Sydney district are family households, at 65.0%. Single person households make up 26.6% of all households. Only 8.4% of households in the district are group households. These proportions are similar across each LGA. Sydney LGA has the highest proportion of group households, at 15.5%. Woollahra has the highest proportion of single-person households at 29.8%. Sutherland Shire has the largest proportion of family households at 76.7%.

Table 22. Household Composition in South Eastern Sydney, by LGA

LGA	Single-person households		Group households		Family households		Total	Average people per household
	No.	%	No.	%	No.	%		No.

## Tenure types

In the South Eastern Sydney district, 27.6% of occupied private dwellings were owned outright at the 2016 census. This is slightly below the state average of 32.2% (see Table 23). The lowest rate of outright ownership was in the Sydney LGA (14.0%), and the highest was in the Sutherland Shire LGA (37.3%).

More people in South Eastern Sydney rent than the state average (41.3% in the district compared to the New South Wales average of 31.8%). The highest rate of renting is in Sydney LGA (62.2%), and the lowest rate of renting is in the Sutherland Shire LGA (21.1%).

**Table 23. Tenure of occupied private dwelling in the South Eastern Sydney, by LGA**

LGA	Owned outright		Owned with mortgage		Rented		Other tenure		Not stated	
	No.	%	No.	%	No.	%	No.	%	No.	%

## Housing affordability

One way to measure housing stress is to calculate the percentage of households who spend more than 30% of their household income on rent or mortgage payments. Of the seven LGAs in the South Eastern Sydney district, Sydney has the highest proportion of households in rental stress (27.5%), followed by Randwick (20.5%). Both of these rates are well above to the state average of 12.9% (see Table 24). The Sutherland Shire LGA has the lowest rate of households paying more than 30% of their income of rent (8.1%). The rate of mortgage stress was highest in Georges River LGA (9.0%), which is above the state average of 7.4%. The lowest rate of mortgage stress was in the Sydney LGA (5.1%).

**Table 24. Mortgage and rent payments in the South Eastern Sydney district, by LGA<sup>1</sup>**

	Rockdale	Botany Bay	Georges River	Randwick	Sutherland Shire	Sydney	Waverley	Woollahra	NSW
Average weekly rent	\$460	\$460	\$450	\$550	\$450	\$565	\$622	\$650	\$380
Renting households where rent payments are less than 30% of household income	83.8%	80.7%	86.3%	79.5%	91.9%	72.5%	81.5%	85.6%	87.1%
Renting households where rent payments are greater than 30% of household income	16.2%	19.3%	13.7%	20.5%	8.1%	27.5%	18.5%	14.4%	12.9%
Average monthly mortgage repayments	\$2,167	\$2,400	\$2,167	\$2,600	\$2,427	\$2,499	\$3,000	\$3,200	\$1,986
Home-owning households where mortgage repayments are less than 30% of household income	91.3%	91.9%	91.0%	94.5%	91.3%	94.9%	94.4%	93.9%	92.6%
Home-owning households with mortgage repayments greater than or equal to 30% of household income	8.7%	8.1%	9.0%	5.5%	8.7%	5.1%	5.6%	6.1%	7.4%

<sup>1</sup> The number of households where rent and mortgage payments were 30% or more of an imputed income measure are expressed in this table as a proportion of the total number of households in an area. The nature of the income imputation means that the reported proportion may significantly overstate the true proportion.

## Social housing

As of 30 June 2018, there was 16,541 social housing residential dwellings in the South Eastern Sydney district (see Table 25). Public housing accounted for 82.4% of these dwellings and community housing accounted for 16.1%. The LGA with the highest number of these dwellings was Randwick.

**Table 25. Social Housing Residential Dwellings in South Eastern Sydney, as at 30 June 2018**

	Public Housing		Aboriginal Housing Office		Community Housing		Indigenous Community Housing		Total
	No.	%	No.	%	No.	%	No.	%
